

BRENTFORD BUS GARAGE, MIDDLESEX

This project is a new bus garage at Commerce Road, Brentford. The garage is to replace an existing garage operated by Metroline Travel and will provide an open area for bus parking, fuelling and washing with supporting office and engineering functions for approximately 106 buses. The garage is to be delivered as part of an adjacent mixed use development by ISIS and the two developments are closely coordinated.

The project comprises a two storey office complex for Metroline operations, including a staff canteen and driver rest facility, engineering bus maintenance facility, an undercover fuelling bay and bus wash as well as external bus parking. It will incorporate energy and natural resource saving measures such as a combined heat and power plant (with the adjoining development), low energy lighting, solar panels, storage and reclaim/reuse of rainwater from the buildings roofs within the site and recycling systems.
